

SUSTAINABILITY POLICY 2010

Company Policy

To Auckland Airport sustainability means operating in a manner that finds the right balance between the economic, environmental, social and cultural aspects of all our activities.

Sustainability is part of business as usual, as well as an essential element in creating and realising the long term vision for Auckland Airport.

Auckland Airport will:

- Implement a pro-active sustainability programme;
- Produce sustainability metrics, set specific, achievable sustainability goals and targets for the following key areas as practicable;
 1. Climate change
 2. Community and sponsorship
 3. Culture and heritage
 4. Economic performance
 5. Energy and fuel efficiency
 6. Environmental sustainability
 7. Environmentally sustainable design (buildings and infrastructure)
 8. Operational efficiency
 9. Employees
 10. Procurement
 11. Reporting
 12. Safety
 13. Sustainable transport
 14. Water conservation
- Work closely with all our stakeholders to enhance the sustainability of New Zealand as a place to live and work, to trade and to host local and international tourists;
- Communicate performance to relevant stakeholders on a timely basis.

Successful implementation of this policy will enhance Auckland Airport's reputation, customer loyalty, passenger experience, and create long term value for our owners, as well as our other stakeholders.

Approved by the Leadership Team 29/10/2010
