

Company Policy

Sustainability

Auckland Airport's core business is the operation of New Zealand's largest international and domestic airport. We are proud of our airport and are committed to providing a unique and compelling customer experience, where every employee represents our country.

Sustainability is integral to the way we think, the way we conduct ourselves, and the approach we take to our day to day business.

In particular Auckland Airport will:

- Operate in a safe, secure, sustainable and efficient manner.
- Balance the economic, environmental, social and cultural aspects of all our activities through a pro-active sustainability programme.
- Produce sustainability metrics, set specific, achievable sustainability goals and targets for the following key areas as practicable.
 1. Climate change
 2. Community and sponsorship
 3. Culture and heritage
 4. Economic performance
 5. Energy and fuel efficiency
 6. Environmental sustainability
 7. Environmentally sustainable design (buildings and infrastructure)
 8. Operational efficiency
 9. Our People (Our Spirit)
 10. Procurement
 11. Reporting
 12. Safety
 13. Surface access
 14. Water conservation
- Work closely with all stakeholders to enhance the sustainability of New Zealand as a place to live and work, to trade and to host local and international tourists.
- Communicate performance to relevant stakeholders on a timely basis.

Successful implementation of this policy will enhance Auckland Airport's reputation, customer loyalty, passenger experience and create long term value for our owners, as well as our other stakeholders.

Signed:

Simon Moutter, CEO
